

AMENDMENT 4

VOTE NO

The deceptive language of Amendment 4 goal will allow unsafe, unrestricted, unregulated abortion on demand UP TO BIRTH without parental consent as determined by someone who does not have to be a physician with medical training.

IF PASSED, ABORTION IN FLORIDA WOULD:

Be legal up to "Viability"
(23-24 weeks gestation)

Be legal up to birth, with the
consent of a "healthcare provider"
(not necessarily a doctor)

Minors would NOT
need parental consent

CURRENT ABORTION LAW:

Florida's "*Heartback Protection Act*" would remain in effect if Amendment 4 is voted down this fall.

Abortion in Florida is legal up to 6-weeks gestation (when a heartbeat is typically detectable).

Miscarriage care and ectopic pregnancy care are NOT abortions. Patients will not be denied care for miscarriages or ectopic pregnancies.

The abortion pill must be administered in person by a physician, outlawing the dispensing of the pill through mail.

Exceptions to the 6-week limit exist in cases of rape, incest, human trafficking, fatal fetal abnormality, or when the pregnant woman's life is in danger.

Abortion providers administering the abortion pill or surgical abortions after 6-weeks gestation may be prosecuted, NOT the woman seeking an abortion.
